

FAASTeam presents:

Summer Safety Briefing and BBQ

CFII Dick Oman will have a look at aviation combinations of GPS Navigation Systems, Personal Electronic Devices and the onset of ADS-B. How are these elements combined to provide the pilot an element of safety? What problems do these devices cause? Is it time to incorporate the technology, reevaluate how we scan for traffic and plan cross-country navigation?

Any time new technology or systems are added to the tools of aviation, distractions and new stresses are also added. How do we proactively reduce or eliminate the new problems they create?

During our flight training we learned the skills and Pilotage. Dead Reckoning and navigation by with nav-aides. How has that changed? And how do these changes effect our Situational Awareness? Situational Awareness = A persons awareness of their surroundings, the meaning of these surroundings, a prediction of what these surroundings will mean in the future, and then using this information to act.

The briefing starts at 1100 hrs.

At noon we'll start cooking up the burgers and hot dogs for our potluck BBQ. Drop by and please bring chips, a dish, or a dessert to share if you
